

I travel to Philadelphia everyday and use XM for my traffic information it is the best most invaluable service I PAY for. Last time I checked this was America and we were free to express ourselves and to buy services and goods as we choose. This is a service I want to be able to continue to use because it goes above and beyond the local FM stations that I recieve and it is available to me at any time day or night. Please do not limit XM's ability to provide me with this service I do not feel it in any way infringes on the rights of the local FM stations rights.
